

Plant Investigation Observation Journal

Since you might not be near a computer when you observe your growing plants, use this journal as a place to write and draw observations.

Here are some questions to consider as you make your observations:

- What does your seed look like? (Think about its size, shape, and color.)
- How long does it take from the time you plant the seed for it to sprout?
- What does the plant look like when it first comes up out of the ground?
- How many leaves do you see?
- Use a ruler to measure how tall your plant is from where it comes out of the soil to the tallest part of the plant. How tall is it?
- How often do you water your seed/plant?

When you're ready to share your observations, visit: <http://seeds.sciencenetlinks.com>

Your Observations

Type of seed / plant: _____

Observation day number (day 1, day 4, day 10): _____

Describe what you see:
