

Photosynthesis and Respiration

Plants give animals sugar and oxygen. Animals return carbon to the plants.
 Answer the questions to fill in the blanks.

1. What are the only things that catch sunlight energy and change it to life?
2. What do #1 suck up from the ground?
3. What's in the air that #1 need to for photosynthesis?
4. As part of photosynthesis, what does #1 release into the air?
5. What does #1 make that lets them store some of the sunlight energy?
6. What use #4 and #5 and makes #3?

- A. capture energy from the sun.
 B. They suck up from the ground.
 C. They breathe in from the air.
 D. They release into the air.
 E. They use the sunlight energy to make
 F. eat the
 G. They breathe in the from the air and use it to "burn"
 the for energy.
 H. They breathe out
