

## Team Moon

Lesson Title: Team Moon

Page 1 of 2

Name: \_\_\_\_\_

Use *Team Moon* by Catherine Thimmesh to answer these questions:

What is the major difference between science and technology?

How do science and technology interact with each other in a project of this kind?

What were some of the design constraints of the Apollo 11 mission?

What kinds of science and technology were required to be able to complete a successful moon landing?

## Team Moon

*Lesson Title: Team Moon*

*Page 2 of 2*

Name: \_\_\_\_\_

In which ways did science and technology evolve since the early 1900s that would eventually lead to space flight?

Why were 400,000 people required to make the Apollo 11 mission a success?

What would be some of the challenges of a project that requires 400,000 people?

What are some of the risks involved in a space mission?
